

## Medical preparation

Omatako Hunting Trails is a malaria free area, so it's up to you whether or not you would like to take extra medication. We recommend that you don't take any precautions for malaria. No other inoculation is needed to enter Namibia.

Omatako is only 1hour 30 min by car from Windhoek where modern medical facilities are available. We are also a member of a medical scheme where all emergencies can be evacuated by helicopter or airplane.

## Climate and Clothing

Hunting season starts from the 1st of Feb to end of November.

Clothing requirements: Bring a pair of well broken in hunting shoes, with soft soles. Make sure you bring no bright colored hunting clothes. Camo, dark brown or green colors are recommended. We have sticky grass and seeds so don't bring hunting clothes made of wool. The hunting season in Namibia can be divided as follows, but there are always exceptions due to weather anomalies.

Feb - April This is our rainy season with warm days and occasional showers more towards the evening. Temperatures will range from 77 - 90 F. If you hunt during these months, bring cool summer clothes with one warm jacket.

May - end August This is winter in Namibia with cold dry mornings and evenings. It can be very cold especially on the back of a hunting truck. Temperatures range between 32 - 68 F. It warms up considerably towards mid day and no rain is to be expected. Bring long sleeve shirts, long pants, gloves and a warm jacket is also highly recommended.

September - November This is the beginning of summer and can be very hot with showers towards the end of November (90 F). The clothing will be the same as for Feb and April.
